Hyperpool® GT K-Series Conversion Kit

ENHANCE YOUR SHAKER'S EFFICIENCY WITH THE HYPERPOOL® GT CONVERSION KIT

The Hyperpool® GT Conversion Kit is designed to fit the BRANDT® KING COBRA™ and KING COBRA VENOM™ shaker frame. The advanced design allows for easy, onsite installation without the need for welding, cutting or changing the flow line and manifold.

The Hyperpool GT Conversion Kit delivers the same benefits you're used to: fluid-centering technology, manual screen angle adjustment and fast, simple screen changes. The kit also delivers substantial dilution and overall cost savings—backed by 75+ years of Derrick solids control innovation.

FLUID CENTERING TECHNOLOGY

The Hyperpool GT shaker retains the trusted screen frame design and fluid centering technology of the original Hyperpool, with notable refinements like increased flow handling, interlocking compression technology and a redesigned shaker bed. Fluid centering technology, in conjunction with Pyramid and Pyramid Plus screen technology, enables the Hyperpool GT Conversion Kit to process up to 50% more wellbore returns than the BRANDT KING COBRA and KING COBRA VENOM shakers within the same footprint. Derrick's proprietary screen panel compression technology in a concave bed, combined with the nitrile rubber bed cushions, provides optimum sealing that eliminates solids bypass and reduces dilution and waste management costs to ease environmental concerns.

BENEFITS	OEM	PMD® HYP GT	PMD+™ HYP GT
Increase in non-blanked open area	21.5 ft^2	22.6 ft^2	30.76 ft^2
Fluid processing (bypass elimination)	76%	Virtually Eliminates Bypass	
Time savings in replacing screens	8 min.	2 min. (75% decrease)	
Time savings in replacing wear parts	60 min.	7 min. (88% decrease)
